

Sarv Pariksha

परीक्षा सबकी, तैयारी पक्की · sarvpariksha.in

User Guide — Teachers & Organizers

Create a real, auto-graded, shareable exam in minutes — from your own question paper, a photo, or AI — with class analytics and score integrity Google Forms can't offer.

1. Why not just use Google Forms?

	Google Form quiz	SarvPariksha teacher exam
Student experience	plain form	real CBT engine: palette, timer, sections, keypad
Question entry	one at a time	paste a whole CSV/Excel sheet, or upload a photo/PDF of your paper — AI extracts the questions
Score integrity	anyone with link can fiddle	scores computed on the server; codes rate-limited; time clamps
Analytics	response sheet	per-question error rates, weakest topics, CSV exports
Student proof	screenshot	verifiable result link for every student
Cost	free	free — 3 exams/day, or unlimited with a free Teacher account

The Teacher plan is free — sign up from the Pricing page

2. My Exams — your organizer home

Sign in → **Dashboard** → **My Exams**. Every exam you create lives here with its attempt counter, share button, analytics, edit and duplicate actions.

My Exams — one row per exam with quick actions

3. Creating an exam — the 3-step wizard

Step 1 — Details

Title, subject, description, duration, positive/negative marking, and public-or-code visibility. Plus two controls worth knowing:

- **AI Hints — On / Off (your call, per exam):** On = students can request AI hints while solving. Off = the hint panel is *completely removed* for that exam, ideal for real test conditions. A badge on the exam card reminds you which exams have hints off.

- **Availability window (optional):** set "opens at" / "closes at" times for scheduled tests — students see a friendly locked screen outside the window and late submissions are rejected server-side.

Sarv Pariksha परीक्षा सबकी, तैयारी पक्की।

Create Teacher Exam (Step 1 of 3 — Exam details)

Exam Title *
Physics Chapter Test — Motion

Subject
General

Description (optional)
Instructions shown to students before they start

Duration (minutes) 15 **Marks per correct** 4 **Negative per wrong** -1

Availability Window (optional)
Opens at: dd-mm-yyyy --:-- Closes at: dd-mm-yyyy --:--
Outside this window students see "not open yet" / "closed" instead of the exam. Leave empty for always available.

Visibility
☒ Public ☐ Private (code)

AI Hints for Students
☒ On ☐ Off
Students can ask the AI for a hint on any question while taking this exam.

Next: Add Questions →

Exam details — visibility, marking, AI-hints toggle and scheduling

Step 2 — Add questions (four ways)

a) Build & edit — the Google-Forms-style builder, upgraded: every question can be an MCQ (2–5 options), True/False, or a numerical keypad question. LaTeX works everywhere with a live preview.

Sarv Pariksha परीक्षा सबकी, तैयारी पक्की।

Create Teacher Exam (Step 2 of 3 — Add questions)

How do you want to add questions?

Build & edit Paste / import From image / PDF From question bank AI generate

Question 1 MCQ True / False Numerical

A body starts from rest and accelerates at 2 m/s^2 . What distance does it cover in 3 s?

Preview: A body starts from rest and accelerates at 2 m/s^2 . What distance does it cover in 3 s?

☒ 9 m ☐ 6 m ☐ 3 m ☐ 12 m

+ Add option (4/5)

Medium Topic (optional)

Upload Image or Paste image URL (optional)

Correct answer: Option A

+ Add Question Paste a whole paper

Manual builder — MCQ with radio-marked correct answer

Create Teacher Exam (Step 2 of 3 — Add questions)

How do you want to add questions?

Build & edit Paste / import From image / PDF From question bank AI generate

Question 1 MCQ True / False Numerical

A body starts from rest and accelerates at 2 m/s^2 . What distance does it cover in 3 s?

Preview: A body starts from rest and accelerates at 2 m/s^2 . What distance does it cover in 3 s?

Correct answer, e.g. 42 or -3.5

Students answer with a keypad; close values match exactly.

Medium Topic (optional)

Upload Image or Paste image URL (optional)

Correct answer: —

+ Add Question Paste a whole paper

Back Next: Review

Numerical question type — students answer on the CBT keypad

b) Paste / import — already have your paper in Excel or Word? Paste rows in any of these shapes:

Row type	Example
MCQ	What is 2+2?, 3, 4, 5, 6, B, easy, Arithmetic
True / False	The sun is a star,,True,False,A,easy,Astronomy
Numerical	Value of π to 2 dp,,,,, 3.14, easy, Numbers

The parser accepts A–D letters, 1–4 numbers, exact option text, or raw numeric answers, handles quoted commas and Excel tab-pastes, and reports per-row problems instead of failing silently. Imported questions land in the builder for a final check.

The screenshot shows the Sarv Pariksha web application. On the left is a 'User Space' sidebar with links for Overview, Attempt Logs, Accomplishments, My Exams, Predictions, Profile Settings, and Settings. The main area displays a question editor modal for 'Question 2'. The modal includes a question text 'What is 2+2?', a preview of the question, and a list of multiple-choice options: 3, 4 (selected), 5, and 6. Below the options is a section to add more options, with a difficulty level of 'Easy' and a topic of 'Arithmetic'. The correct answer is noted as 'Option B'. The modal also shows buttons for 'MCQ', 'True / False', and 'Numerical' question types, and a trash icon for deleting the question.

Bulk import — rows become fully editable questions

c) From image / PDF — photograph your printed paper (or upload a digital PDF), optionally add your **syllabus** (paste it or upload a file) so the AI prioritises your units, and press **Extract questions with AI**. Photos are read on-device via OCR; PDFs via their text layer. Extracted questions always land in the builder — *review them before publishing*.

Sarv Pariksha परीक्षा सबकी, तैयारी पक्की।

Create Teacher Exam (Step 2 of 3 — Add questions)

How do you want to add questions?

Build & edit Paste / import **From image / PDF** From question bank

AI generate

Upload your question paper
Photos or screenshots of a printed paper (OCR) or a digital PDF with selectable text. Optionally add your syllabus below so AI keeps only the questions from your units. Every extracted question lands as an editable draft you review before publishing.

Choose images / PDFs

Syllabus / topics to focus on (optional)
Paste your syllabus or unit list — AI prioritizes questions from these topics and labels them correctly. You can also upload it below.

Unit 1: Kinematics
Unit 2: Laws of Motion
Unit 3: Work, Energy & Power

Upload syllabus file 70 chars

Extract questions with AI

Back Next: Review

Image/PDF extraction with an optional syllabus focus

d) AI generate / Question bank — pick category, subjects, topic focus, count and difficulty and AI writes a fresh paper; or draw from the built-in JEE/NEET/GATE bank.

Sarv Pariksha परीक्षा सबकी, तैयारी पक्की।

AI generation options

Step 3 — Review & publish

A full preview of the paper and settings. Publishing creates a share link of the form `sarvpariksha.in/take/TE-xxxxxx`. Private exams additionally show a code you hand out in class.

4. Sharing & the student experience

1. Press **Share** on the exam card — the link (and code, if private) is copied.
2. Students open the link: private exams ask for the code (wrong codes are rate-limited automatically), then they enter their name.
3. The exam runs in the same CBT engine students already know from mock practice.
4. On submit, the score is **computed on SarvPariksha's servers** — students cannot forge it — and appears on your analytics instantly.
5. Each student also gets a personal **verified-result link** (like `sarvpariksha.in/r/ATT-...`) that anyone can open to confirm the score is genuine.

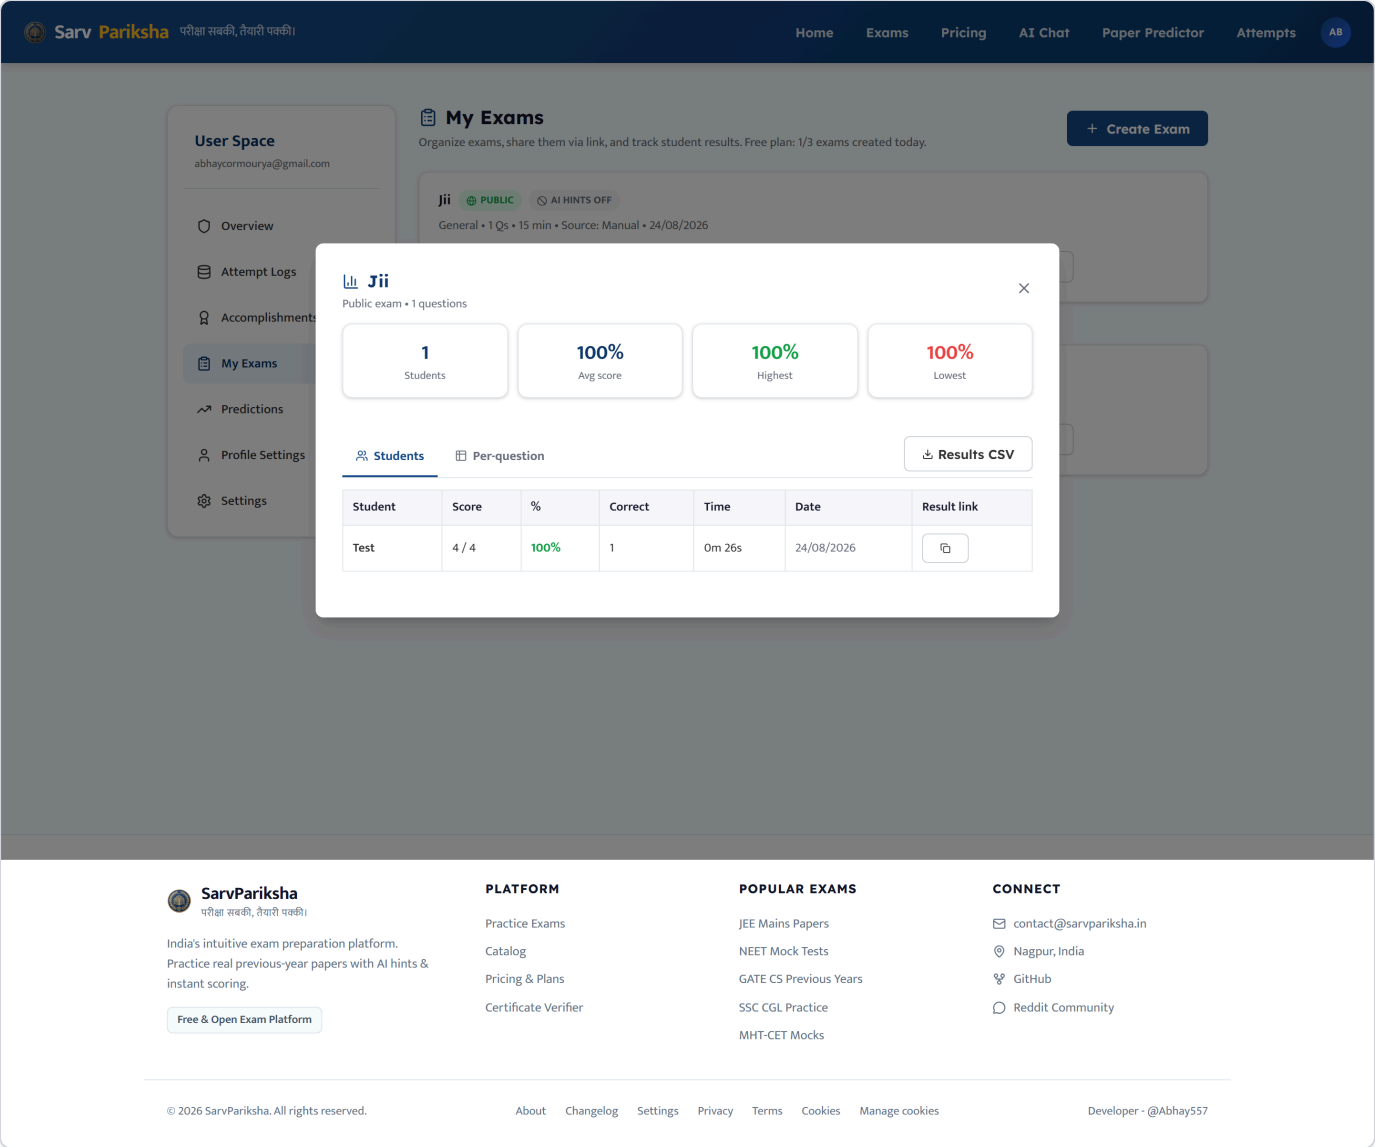

Students see a clear message if a link is wrong or an exam closed

5. Analytics that actually help you teach

Open **Analytics** on any exam:

- **Students tab** — every attempt with score, %, time and a copyable verified-result link per student. Export everything as **Results CSV**.

- **Per-question tab** — correct-rate bars for every question plus a "weakest topics" callout, so you know exactly what to re-teach. Export as **Analysis CSV**.

Students tab — roster with verified links and CSV export

परीक्षा सबकी, तैयारी पक्की।

Developer - @Abhay557

Per-question tab — spot the questions your class struggled with

6. Managing exams

- **Edit** — reopen the wizard with all questions loaded; the share link never changes.
- **Duplicate** — clone an exam into a fresh copy (great for section A/B test variants).
- **Schedule** — set opens/closes times; outside the window students see a friendly "not open yet" / "closed" screen, and late submissions are rejected server-side.
- **AI Hints Off** — remove the AI hint panel completely for exam-like conditions.
- **Delete** — removes the exam and its attempt records (asks twice).

Integrity built in: scores are recomputed server-side, access-code guessing locks out after 15 tries in 10 minutes, submitted time is clamped to the exam duration, and closed exams refuse submissions — even from stale tabs.
